GIVEN UPROARIOUS WELCOME—The new Queen of the Atlantic, the superliner United States, is given an uproarious welcome as she pulls into the harbor at Le Havre, France, after completing her maiden voyage in a record-breaking three days, 19 hours and 40 minutes. To wrest away the honor of the fastest ship to cross the Atlantic from the Cunard liner Queen Mary, the United States averaged 35.50 knots—approximately 41 land miles per hour. The liner is partially obscured by the spray of water from the welcoming tugs.

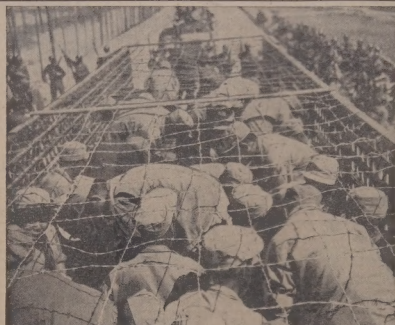

GLIDING RACES—Catalanists prepares to enter gliders at Chateau Vieux airport near Madrid, Spain, where the world's gliding championships are being held. Pilots from 19 countries are participating in the various events.

BOUND ON HER ANNUAL SUPPLY TRIP through uncharted northern waters, the Department of Transport supply ship C. D. Howe presents a striking picture as she sails majestically out of Montreal. Flattering over her stern like a bird returning to its nest is the helicopter that will serve as the 'eyes' of the Federal Government ship during the trip, through ice-bound waters. Also carrying a few passengers the ship, which left June 27, will be gone for several weeks.

ONE POUND EQUALS 2,500,000—Captain Hyman George Rickover, (left), designer of the world's first atomic-powered submarine, with a model of the sub, shows the effluents of the atomic power plant, which is being inspected by Navy Secretary Dan Kimball. Navy experts claimed that one pound of the sub's nuclear fuel will generate as much power as 2,500,000 pounds of coal or 300,000 gallons of gasoline in conventional submarines. Showing of the model coincides with the presentation to Capt. Rickover of a second Legion of Merit for his work on the sub.

TENTERS CURBED BY STEEL YOKES—With Allied guards lining either side of the road, North Korean prisoners huddle under barbed wire as they are transported by truck from one compound to another on Kije Island. A total of 22,500 prisoners have been moved out of four large compounds to a series of smaller stockades without any opposition. The mechanics of the prisoners indicated that U.S. guards on the strip-driven island had gained unchallenged control over 80,000 prisoners who only a few days earlier ran their compounds unbothered and defied their captors.

BLACKSMITH ART FASCINATES QUEEN—As part of a busy schedule of public appearances, Queen Elizabeth watched a contest in the horseshoe-making contest in London. The Queen appeared fascinated as the blacksmiths pounded the metal into shape.—Control Press Canadian.

PUERTO RICANS CELEBRATE INDEPENDENCE—Puerto Ricans march through San Juan to mark their first 'Independence Day'. Puerto Rico is now operating under a constitution, almost free from U.S. influence.—Control Press Canadian.

R.A.F. FLANK HITS BRITISH TOWN—With two houses demolished, British are shown fighting to save the 10 other homes that were not as well as when an R.A.F. two-engined bomber crashed into a group of pre-fabricated houses at Wilshire. The pilot and a ministry of supply official were killed and the nine other persons aboard were injured. Note a part of the plane's engine under the bomber's ladder.—Control Press Canadian.

WHIMS OUT OF STEP—Patsy, mother of four kittens, marches her newly-acquired son across the floor. Donald was accepted by Patsy as one of her own when he was brought home by Jerry Catlett, 11, son of Mr. and Mrs. W. L. Catlett, of Oakland, California. The duck's foster mother was so confused when he jumped into the milk dish instead of lapping it at fashion but everything worked out in the end.

THE LARGEST FOREST PRESERVATION PROJECT in Canadian history is currently taking place in New Brunswick under the project name of 'Victorian Bushcraft'. Fifteen planes are busy spraying more than 200,000 acres of heavily wooded area in Restigouche County with DDT in an effort to destroy the badworm infestation which is threatening valuable spruce trees in the area. The project is being watched closely by specialists from all parts of Canada and the United States. They hope that pest control in the forests will be made easier by this experiment which is jointly sponsored by the New Brunswick Government and the New Brunswick International Paper Company. In the photo above a spray-plane leaves a white plume of insecticide over budworm-infested areas.

RETURNS HOME—Fred Albrecht, of the Conservation at McGill University, returns home recently aboard the Empress of Canada. The Canadian company is scheduled to conduct the BBC's northern expedition in a special Dominion Day broadcast which featured one of his own radio programs.

CITY OF KINGS—Lima, Peru, capital of the Republic of Peru, is called the 'City of Kings'.

PROPERLY IMPRESSED—Ginger and Debbie Pearce, two tiny tots in polo-plagued Houston, Texas, seem properly impressed as they leave an inoculation room after taking part in a mass inoculation against polio.

THE WINNAB—A 14-year-old Oshawa boy, who had to shed all of his pocket collection of junk to meet the 200 pound limit for driver and car, is this year's winner of the Montreal Kiwanis Club's annual 'wasp' derby. Bobby Jackson won the Birks Trophy by beating last year's champ by a scant one second margin. The photo above shows the champion in the protective barrier at the end of the track.

NO MONKEY BUSINESS, NOW!—Shute, a Java monkey mascot, busied as she chides her 'adopted' month-old kitten and just dares anybody to take it away from her. Recently the dirty kitten wandered into the home of an animal trainer in Knoxville, Tenn. Shute promptly took charge of it and will fight anyone who tries to take it from her.

FIRST AID

First Aid is just what the two words imply, namely the earliest possible intelligent aid to be applied to the victim of an accident or sudden illness. It is usually of a temporary nature only, to be given once, at the time of the accident or sudden illness and before a doctor is available to assume responsibility.

SIGNS AND SYMPTOMS OF SEVERE BLEEDING

1. If the bleeding is small in amount but continues over a period of days or weeks or makes the victim become greatly exhausted.
2. If the bleeding is profuse, whether it is external, internal or concealed the victim presents the following signs and symptoms:
3. Faintness, weakness, collapse.
4. Pulse is rapid and weak.
5. Anxiety and restlessness.
6. Shortness of breath progressing to air hunger.

First Aid

1. To all cases the victim should be kept lying down on as level a surface as possible, the head higher than the feet.
2. Legs but warm covering.
3. Frequent sips of fresh air.
4. Reassurance and allaying of anxiety.
5. Send for the doctor or arrange for transportation of the victim to the nearest hospital.
6. Frequent small drinks of cold water.

First Aid to External Bleeding

It is necessary to know whether an artery or vein or both are bleeding. The only point that matters is the extent at which the blood is lost.

1. Direct Pressure.
2. Tourniquet.
3. Elevation.
4. Apply a firm pad of any clean material that is available and bandage firmly in place.
5. Keep the victim quiet and warm.
6. If the bandage rapidly causes swelling, remove it and apply a fresh bandage.

Method 2. (c) Apply finger pressure. A Pressure Point is the point where the artery or vein can be blocked by pressing it against a bone. Learning the Pressure Points of the human body is a most useful and practical way, as fingers are small and can be used to apply pressure from the pressure and not the weight of the hand.

Large Artery (Arteries) bleed with blood, send for a doctor or arrange for quick transport of the victim.

Method 2. (f) Apply finger pressure. A Pressure Point is the point where the artery or vein can be blocked by pressing it against a bone. Learning the Pressure Points of the human body is a most useful and practical way, as fingers are small and can be used to apply pressure from the pressure and not the weight of the hand.

Large Artery (Arteries) bleed with blood, send for a doctor or arrange for quick transport of the victim.

Method 2. (f) Apply finger pressure. A Pressure Point is the point where the artery or vein can be blocked by pressing it against a bone. Learning the Pressure Points of the human body is a most useful and practical way, as fingers are small and can be used to apply pressure from the pressure and not the weight of the hand.

World Happenings Briefly Told

The Duke of Edinburgh was recently appointed to command in the Royal Navy. At 31, the Duke is the youngest of 44 lieutenants, command to be promoted.

British and French technicians have devised a plan to relay electric power across the English Channel by submarine cable. The British Electric Authority said.

An Irish postage stamp with an arctophile discovered recently in Spital, Austria, is genuine, and therefore the oldest known stamp in the world, a committee of philatelic authorities said.

The Panama diamond mining accident claimed a 22-carat "giant" diamond, the largest mined in India this century—had been found in the mine.

Why Golf Balls Have Dimples

Why have golf balls dimples? Not just to make them look pretty. Old-time golfers used to find out that when they took off on a long hole it didn't go as far as old, nicked-up ones did. So they used to make their own balls.

The modern manufacturers have found the right angle into the ball. But nobody knew why the balls traveled farther until the science of aerodynamics came up with the answer.

A smooth sphere creates air drag that, check it forward motion to the right-hand side.

But a ball with dimples creates a dimpled sphere breaks up the air, creating less drag and propels the ball to go farther.

The A. O. Spalding people have proved it, according to a magazine. Using an automatic driving machine that delivered a measured amount of force, they tested golf balls that were smooth, dimpled, and half dimpled and half smooth.

The smooth variety flew an average of 250 yards, the smooth ones only 125.

The smooth variety flew an average of 250 yards, the smooth ones only 125.

How To Stop A Hitting Slump

It's an old saying in the "big leagues" that the reason most of the hitting slumps have nothing to do with you or your "place" hitting—the ball is just that it will stop you out of your slump quicker than anything else.

First, check your physical condition. If you're not in the best of health, you may be hitting slumps.

Second, keep track of how you're getting out. If the opposition has improved a weak spot and if they have you may not get to work and eliminate it by hard practice.

Fourth, make sure you're relaxed when at the plate. Keep those shoulders loose, your arms swinging smoothly, easy swing and don't try to force it.

Finally, learn how to "place" your ball. "Then you won't have to worry about making a hit, it's possible. If not, make sure you eat at least one hot before you go to bed. Put away what your appetite calls for."

Regularity Key

On the day of a game or athletic event, make sure you keep to your daily routine. Get up at the same time you always do. If you change your diet, or your sleeping habits, or your body, it's a sure sign that you're not in the best of health.

Remember, the hitter who just stands there who just stands there who just stands there.

Local and District

Mrs. Russell Bradford, and her sister from Bradford, left this week for the Pacific Coast on a two weeks' holiday.

Geo. Snyder, of Mannix Construction Co., P.C., was a visitor in Delia last week.

Delia United Church Sunday School picnic was held in the Hand Hills on Wednesday afternoon of this week.

Mr. and Mrs. R. J. Wallace and family, returned on Sunday from a two weeks' motor vacation at the Pacific Coast.

Mr. and Mrs. R. A. Laver and family, spent a recent motor holiday in Prince Albert, Sask.

Born to Mr. and Mrs. John Battle, Jr., at Huns Hospital, Thursday, July 17, 1952, a daughter.

Mrs. Josephine Marshall, of P.M.H., Ponka, is holidaying with her parents, at Delia.

Mr. and Mrs. James Simpson and family left by car for a short holiday at the Pacific Coast on Wednesday.

Harold Nicholson, of Gibson Motors, was a visitor to Calgary on Tuesday.

A copious rain fell over the week end, lasting till around noon Sunday, with occasional showers Monday. Clear skies and bright sunshine prevailed during Wednesday morning, but clouding over in the evening, with temperatures in the 70's.

L. E. Larder arrived home on last Friday night, following over a month's visit to his mother and his old home and birthplace in Nova Scotia. While there he visited with Mr. and Mrs. John D. McKay, Mr. and Mrs. A. Dauphine, and other former residents of Delia and district. He also made a trip to the United States, and visited Niagara Falls, with his splendid array of souvenir photographs having a splendid vacation.

WHO Helps Egyptians Improve Water Supply

ALEXANDRIA — A scheme which aims at providing safe drinking water under pressure to all rural areas of Egypt has been started in Fayoum, directed by the Egyptian Ministry of Municipalities and Rural Affairs. It was announced here by the Regional Office of the World Health Organization (WHO), one of the U.N. agencies.

The plan entails long-distance pumping of water from the Nile which has been freed by sedimentation, filtration and sterilization, according to A. G. Russell, Environmental Sanitation expert of WHO's Regional Office, who recently surveyed the Egyptian health project.

Work has already been completed in the southern part of Fayoum province and plans for the northern section are now being studied. Plans also are ready to apply this system next in northern Egypt, WHO officials said.

Card of Thanks

I would like to express my sincere thanks to my Delia friends for cards, letters, flowers and gifts and for the many kind wishes and prayers for me and my patients in the Drumheller hospital.

Mrs. D. J. Waters.
